SUMMARY

Senior Product Designer with 5+ years shipping SaaS and mobile products end to end — research through developer handoff. Currently Senior Product Designer at AST, where AI-assisted workflows (Claude Code as a build partner, not a novelty) have become part of how the work actually gets shipped: five live products across healthcare, e-commerce, booking, and motion this year alone, each planned, built in small verified steps, and shipped.

EXPERIENCE

Senior Product Designer, AST

Jun 2026 – Present

- Own product design across a multi-project portfolio spanning healthcare (EMR compliance flows, AI intake agent design), e-commerce (a live production storefront), booking platforms, and motion/brand work.
- Established an AI-assisted design-to-ship workflow — Claude Code for Figma automation, full-stack builds, and interactive prototyping — cutting time from design decision to working, verified product.
- Shipped a live production e-commerce storefront (Next.js + Supabase) including catalog, admin CMS, and a full multi-photo gallery system; caught and fixed systemic bugs before they became support tickets.
- Designed and built a healthcare EMR's billing/claims data model and an 8-screen compliance flow enforcing clinical documentation standards, reusing and extending the product's existing design system.

Sr. UI/UX Designer, Tafsol Technologies

2023 – Jun 2026

- Led UI/UX strategy for SaaS platforms (LMS, ERP, CRM, dashboards), improving usability and workflow efficiency.

- Managed end-to-end design lifecycle — user research, wireframes, prototypes, design systems, developer handoff — within Agile teams.
- Mentored junior designers.

Sr. UI/UX Designer, Legendesk

2022 – 2023

- Designed high-converting landing pages and contributed to an internal SaaS sales portal, enhancing engagement and operational efficiency.
- Delivered wireframes, interactive prototypes, and high-fidelity UI with seamless design-to-development handoff.

Executive UI/UX Designer, Fossphorus

Feb 2022 – Aug 2022

- Led responsive web design projects from concept to deployment, translating client requirements into structured, user-friendly interfaces.
- Collaborated with cross-functional teams to ensure usability, visual consistency, and on-time delivery.

Jr. Graphics & Web Designer, TRC

2021 – 2022

- Created social media creatives and assisted in end-to-end website design, strengthening brand presence and UI consistency.
- Built foundational expertise in branding, typography, and responsive web design principles.

SKILLS

Core competencies: UI/UX Design, Product Design, SaaS (LMS/ERP/CRM), Design Systems, Wireframing & Prototyping, Information Architecture, User Research, Usability Testing, Responsive/Mobile-First Design, Conversion Rate Optimization (CRO), AI-Assisted Design Workflows, Agile/Scrum, Cross-Functional Collaboration

Tools & systems: Figma, Framer, Webflow, Adobe Suite, HTML/CSS, Claude Code, GitHub, Design Systems, Component Libraries, Developer Handoff Documentation

EDUCATION

BS Mass Communication (Media Sciences), University of Karachi — Dec 2025, Karachi
